PROFESSIONAL SUMMARY

Computer Science graduate passionate about **software development**, with experience building production-ready full-stack applications using **Python, Django, React, and REST APIs**. Skilled in backend development, database design, authentication, and scalable application development using Docker, Git, and AWS. Strong foundation in Data Structures, Algorithms, OOP, and software engineering practices, with a focus on building reliable and maintainable applications.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: HTML, CSS, JavaScript, React JS

Backend: Django, FastAPI, REST APIs.

Databases and Cloud: MySQL, Git, Docker, AWS.

CS Fundamentals: Data Structures, Operating Systems, Object-Oriented Programming (OOPS)

INTERNSHIP

AWS Cloud Computing Virtual Internship – SmartBridge

| Jan – Mar 2022

- Developed a responsive **Restaurant Management System** frontend using **HTML, CSS, and JavaScript**, focusing on UI design and interactive functionality.
- Implemented **responsive layouts and client-side interactions** to provide a user-friendly restaurant management experience.
- Deployed the web application on **AWS**, gaining hands-on experience in cloud-based application hosting and deployment.

PROJECTS

WorkFlowHub: Team Project & Task Management | [link](#)

| June – July 2022 |

- Developed a full-stack Team Project Management Platform using **Django REST Framework, React.js, and MySQL** for managing projects, tasks, teams, and comments.
- Implemented **JWT authentication**, role-based access control, CRUD REST APIs, input **validation, search, filtering**, sorting, pagination, and protected endpoints.
- Built responsive React dashboards and containerized the application with **Docker**, configured CI using **GitHub Actions**, and tested REST APIs using Postman.

ShopSphere: Full Stack E-Commerce Web App | [link](#)

| July – Aug 2022 |

- Developed a full-stack e-commerce application with a **Django REST Framework** backend and separate frontend, implementing secure token-based **authentication** for 100+ user sessions during testing.
- Designed 7+ relational models and **DRF serializers** to manage products, carts, and orders using **PostgreSQL**, reducing query response time by ~30% via query optimization.
- Built and integrated with RESTful APIs connecting frontend and backend for core flows like browsing, cart, and checkout.
- Implemented role-based access control and order-status workflow, improving admin order management efficiency.

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner** - Amazon Web Services [link](#)
- Received the "**Best Tech Stack User**" award at a National-Level Hackathon [link](#)

EDUCATION

B.E. in Computer Science -- BITM Ballari, Karnataka

2022 – 2026

CGPA: 9.29 / 10

2nd PUC -- BIPU Badagandi, Karnataka

2020 – 2022

Percentage: 86.67%
